

Euroweep-Vent

- Dual-function weep and ventilator
- Integral baffle
- Vertical front
- Reduced size without bottleneck exit route

PRODUCT NAME	Euroweep-Vent
SIZE	87 x 49 x 9mm
FREE AIRFLOW RATING	300mm ²
COLOURS	Grey Black Beige Brown Terracotta White Translucent
MATERIAL	Polypropylene
OBSERVATIONS	Dual-function ventilation / water evacuation

USE

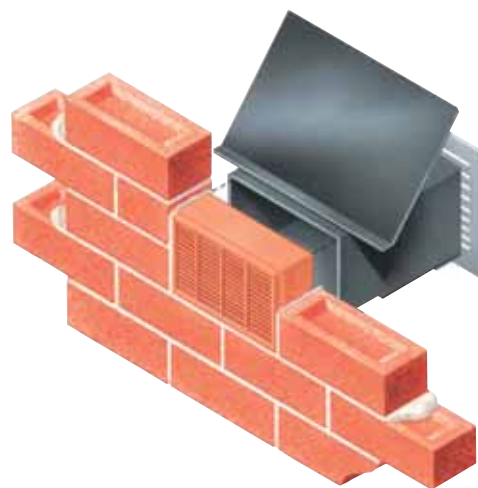

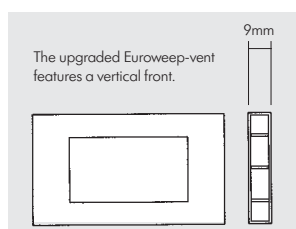

The purpose and function of the perp weep/ ventilator is described on the previous pages (Type W).

An alternative product is now available offering smaller overall dimensions but with high performance categorisation.

SOLUTION

Euroweep-vents are positioned within the perp joints between masonry. Their function is twofold. They act as a weep to discharge water from DPCs, cavity trays and lintels.

They also act as ventilators to encourage the cavity to breathe. Euroweep-vents were developed and are now extensively used on the continent. They can also satisfy UK, N.H.B.C. and Building Regulation requirements. Compact size does not compromise the performance of the Euroweep-vent which promotes excellent free airflow and discharge behaviour.

Vent Packs

Room Ventilation Packs and Appliance Packs

- Three airflow levels
- Complete ventilation packages
- Accompanying protective cavity tray
- Easy stock control and selection

PRODUCT NAME	Ventilation Packs – Through Walls
SIZE (3)	Single, double & tripe brick sizes x 300mm duct
FREE AIRFLOW RATING	6700mm ² 13,700mm ² 20,700mm ²
COLOURS	White grille black sleeve terracotta brick (other brick colours available)
MATERIAL	Polypropylene
OBSERVATIONS	See Cavitytrays for sleeves and ducts

USE

Provide ventilation to habitable rooms. Also air ventilation for areas in which boilers are enclosed.

SOLUTION

A total of three packs, each of which consists of a cavibrick(s), a sleeve, an interior grille and a protective DPC cavity tray. Ideal for new construction and refurbishment work.
