

(Dual coded product, referenced CSV in other applications)

Type CLV

Louvered Ventilator

- Louvers deflect driving rain and provide insect screening
- Integral location grips
- Higher air throughput

PRODUCT NAME	Type CLV Circular Louvered Ventilator
SIZE	70/79 x 15mm
FREE AIRFLOW RATING	2,100mm ²
COLOURS	Terracotta Black White Brown Beige Buff
MATERIAL	Polypropylene
OBSERVATIONS	Requires 70mm hole

USE

Louvered ventilator that can be used to ventilate an existing cavity wall.

SOLUTION

The Type CLV is popular in after-fit drill and vent applications. It can be introduced when the wet trades have finished. It differs from most circular ventilators as it has an airflow aperture rating of 2100mm². The installer is required to drill fewer holes around the building, as fewer ventilators are required to provide the requisite levels of ventilation.

Example: if a small circular vent has a free area of 300mm, it would require seven such ventilators to equal the free area of one Type CLV. The Type CLV is commonly installed at 1.2m centres to fulfil ventilation requirements in typical applications and is offered in a range of masonry harmonising colours: terracotta, black, white beige and brown. Projecting location grips hold the Type CLV in place when inserted into the drilled hole.
